

Company: Alvin Tech

Security Patching Report

Report Date: March 15, 2025

Prepared by: Internal IT Security Department

Period covered: January 1, 2025 - March 1, 2025

Executive Summary

This report documents the security patching activities conducted by Alvin Tech in response to regulatory findings from last year's audit. Our team has implemented critical patches to address identified vulnerabilities in our virtual card processing systems and wallet management services.

Patching Activities

1. Operating System Patches

Server Group	OS Type	Patch Level Before	Patch Level After	Completion Date
Payment Processors	Linux Ubuntu 20.04	Security Update 2023-09	Security Update 2025-02	Feb 15, 2025
Database Servers	Oracle Linux 7.9	Security Update 2024-06	Security Update 2025-01	Jan 28, 2025
Web Application Servers	Windows Server 2019	Security Update 2023-10	Security Update 2025-02	Feb 10, 2025
Internal Admin Tools	Windows Server 2016	Security Update 2023-08	Security Update 2024-12	Jan 22, 2025
Testing Environment	Various OS	Multiple outdated patches	Not completely updated	Ongoing

Notes:

- Legacy systems in the testing environment are still being evaluated for compatibility with latest patches
- Planned completion for testing environment: April 15, 2025

2. Application Patches

Application	Previous Version	Current Version	Vulnerabilities Addressed	Completion Date
Payment Gateway	v4.2.1	v5.0.3	CVE-2024-7890, CVE-2024-8876	Feb 5, 2025
Wallet Management System	v3.5.0	v4.1.2	CVE-2024-9012, CVE-2024-9145	Feb 12, 2025
Card Issuance Portal	v2.8.7	v3.2.1	CVE-2023-8867, CVE-2024-2358	Jan 30, 2025
Admin Dashboard	v1.9.3	v2.0.1	Multiple XSS vulnerabilities	Feb 20, 2025
Customer Support Tool	v3.1.0	v3.1.0	None (Compatibility issues)	Not completed

Notes:

- Customer Support Tool remains unpatched due to compatibility issues with newer versions
- Custom patches have been applied to mitigate the most critical vulnerabilities

3. Database Security Updates

Database Type	Previous Version	Current Version	Security Improvements	Completion Date
PostgreSQL	12.3	15.2	Enhanced encryption, access controls	Feb 8, 2025
MongoDB	4.4.1	6.0.4	Authentication improvements	Feb 15, 2025
Redis Cache	5.0.7	7.0.9	Network security enhancements	Jan 25, 2025

4. Third-Party Components

Component	Previous Version	Current Version	Status	Notes
Payment Processing Library	v2.4.5	v3.1.2	Completed	PCI DSS compliant
Authentication Framework	v1.8.3	v2.2.1	Completed	Security improvements

Reporting Engine	v4.1.0	v4.1.0	Not Updated	Vendor no longer supports this version
SMS Gateway	v3.0.2	v3.5.1	Completed	API security improvements
Email Service	v2.8.7	v3.0.3	Completed	TLS 1.3 support added

Known Issues and Mitigation Plans

1. Customer Support Tool (v3.1.0)

- Issue: Vendor no longer supports this version, but newer versions are incompatible with our customizations
- Mitigation: Custom security patches applied, restricted network access, additional monitoring
- Resolution Plan: Complete replacement scheduled for Q3 2025

2. Reporting Engine (v4.1.0)

- Issue: Outdated component with known vulnerabilities
- Mitigation: Isolated to separate VLAN, restricted access, enhanced logging
- Resolution Plan: Replacement project initiated, estimated completion June 2025

3. Testing Environment

- Issue: Multiple systems not fully patched
- Mitigation: Network isolation from production systems
- Resolution Plan: Complete patching by April 15, 2025

Conclusion

The security patching initiative has addressed 87% of the identified vulnerabilities from the previous audit. The remaining issues have documented mitigation strategies and concrete timelines for resolution. We believe these efforts demonstrate our commitment to maintaining a secure environment for our virtual card and wallet services.

Approvals:

Maya Johnson, *Chief Information Security Officer*

David Chen, *VP of Technology Infrastructure*

Sarah Williams, *Lead Security Engineer*
